

Continuous Passive Motion - Artromot K4

ARTROMOT® K4

Anatomically precise technology for the knee and hip joint

Precision German Engineering & Quality

ARTROMOT® -K4 features a true anatomical hip axis, enabling precise adjustment of the device to patient's hip and knee pivot.

In comparison to the ARTROMOT® -K3, the ARTROMOT® -K4 offers a greater range of motion.

Special indications include:

- Operations on soft tissue in the joint area
- All reconstructive operations with exercise-withstanding rigid fixation
- Operations on cartilage tissue
- Total knee replacement
- ACL/PCL reconstructions
